Subject: Draft digital assets RFI comments
Attachments: Draft EPA Comments on OSTP Digital Assets RFI.docx

Hey MC and Paul,

I took a first crack at formatting our response to the OSTP RFI. As a reminder, the comment period ends on 5/9/22 and the RFI indicates that the subject line of the submittal email should include: "RFI Response: Climate Implications of Digital Assets".

Additional considerations we might need to consider are:

1. Do we want to submit this as an official EPA response to the RFI, or should we be more cautious about submitting this response in a way that will be published along with all other comments?
2. Since the RFI asks for one response per organization, should we be coordinating this response with OAR and the other regions?

Ex. 5 Deliberative Process (DP)
